

THE SPACE JOURNAL

Space Stories, News and Stuff That Matter the Most

Press Release

The Space Journal

July 1, 2022

Launch of www.thespacejournal.com

The Space Journal at www.thespacejournal.com has been launched to serve as an online international space portal of India for the next-generation, forward-thinking, urbane readers. The portal encompasses all aspects of Astronomy and the global Aerospace industry, with a special emphasis on India's space exploration.

Target readers of the portal include Aeronautical/Aerospace/Astronomy aspirants, students, professionals, veterans, designers, engineers, industry managers, scientists and experts. The prime purpose of the portal is airing opinions, promoting discussion, imparting knowledge and offering engagement opportunities with space.

The portal predominantly features exclusive articles, special reports, interviews, videos, quizzes and pieces of expert opinions written by the editor Antara Bhoi and other expert contributors in the field. Exclusive articles announcing new or ground-breaking discoveries are also shared with priority. The portal also aims to promote space themed projects, contests, events and quizzes while offering a myriad of useful resources targeted primarily towards the young audience.

Space Prime Categories: The portal has several prime categories

1. **Aeronautics** – Category focusing on Aviation, Aerodynamics, Meteorology and Defense
2. **Astronomy** – Category focusing on Astronomical Sciences (Outer Space, Planets, Extraterrestrial Life and Astrophysics)
3. **India** – Category focusing primarily on India's primitive and modern space exploration and ISRO missions
4. **The Faces** – Information about key Astronomers, Astronauts and Space Scientists.
5. **STEM** – Category focusing on Science, Technology, Engineering and Mathematics (STEM) based learning, education and career opportunities.
6. **Space Exploration** – Category that focuses on global space exploration missions and technological advancements

About Editor-in-Chief: The portal is the brainchild of Antara Bhoi, who owns, has created, writes for, and manages it. Unbelievable it may sound, but Antara is just twelve-year-old. She is a prodigious girl from Pune who is passionate about space and likes to gain and re-share her knowledge to the world. She also has mastered English language to a top-notch CEFR C2 level and is an award-winning English language influencer, author and grammar geek who also lives with her passion for sharing her English knowledge with all.

We are thrilled to announce the launch of the portal and invite the readers to explore the portal.
